Stewed Peas Stuffed With Nuts.

Luncheon Tastes.
HAM CROQUETTES.—A cupful of finely chopped boiled ham, a cupful of breadcrumbs, two cupfuls of hot mashed potato, a large tablespoonful of butter, three eggs and a speck of cayenne pepper. Beat ham, butter, pepper and two eggs into the potato. Let the mixture cool slightly, then shape into croquettes. Roll in breadcrumbs, dip in the third egg beaten, then in crumbs. Put into frying basket and plunge into boiling fat. Cook two minutes.
Baked Ham With Tart or Spice Sauce.—A ham, dash of pepper and cloves, three tablespoonfuls of flour, a quarter cupful of brown sugar, two cupfuls of water, two tablespoonfuls of vinegar, a few whole spices. The ham should be boiled the day before. Wash in warm water, then put on to boil in cold water enough to cover. Roll slowly thirty to forty-five minutes, leave in stock twenty-four hours. Remove the skin and dust with pepper and place cloves in the fat part. Cover with two tablespoonfuls of flour and brown sugar, add water, put in hot oven and bake forty-five minutes or until nice and brown, basting two or three times. Remove ham to hot platter and to the gravy add two tablespoonfuls of vinegar, the whole spices and enough water to make two cupfuls. Add a tablespoonful of flour thickening and boil three minutes; then strain.
Bacon and Split Peas.—Put the peas to soak the day before required. Wash them well and remove any that are discolored. Tie the peas loosely in a muslin bag, then boil until quite soft. While the peas are cooking trim off the rind of some fat bacon, and just before the peas are ready for the bacon, place on a dish and keep hot. Rub the peas through a sieve, then add the seasoning and some of the bacon fat. The bacon and peas should be served in separate dishes.

Anna Thompson.

The KITCHEN CUPBOARD

ANCHOVY APPETIZERS.
ANCHOVY BONNE BOUCHES.—Prepare slices of very thin, crisp toast, stamp them out with a round cutter about one and one-half inches in diameter; butter them and place a layer of thin slices of roast chicken and alternately very finely shredded lettuce leaves over each. Ornament the tops with fillets of anchovies in the form of lattice work. Dish up on a folded napkin, garnish with parsley and serve. Instead of buttering the toast a thin layer of tartare sauce may be used.
Anchorovy Sauce Tartare.—To one-half cupful of mayonnaise sauce add a teaspoonful each of anchovy sauce, chopped shallot, parsley, chervil and tarragon. Cut thin slices from a large dinner roll, butter these and place on each a slice of hard cooked egg and two anchovies, boned and split; cover with the above sauce and serve garnished with watercress.
Anchorovy à la Russe.—Fry little rounds of bread in hot butter till a pale brown, put four tablespoonfuls of butter in a saucepan and when melted break in one whole egg and two yolks of eggs; beat well together until it begins to thicken over the fire; chop three olives with six anchovies, a little gherkin and two pickled walnuts or truffles, mix them with the eggs, stir well together; pile on the bread, which should be spread with a little anchovy paste, and serve very hot on hot plates.
Anchorovy Puffs.—Roll out scraps of pastry thin. Wipe and lard six anchovies. Cut the pastry into pieces the length and double the width of the anchovies; place an anchovy on a piece of pastry, wet the edges and fold over pressing the edges well together. Place the puffs on a greased baking tin, brush them over with beaten egg and sprinkle with grated cheese and dust of red pepper. Bake in a hot oven for ten minutes. Serve them immediately. Sardines may be used instead of anchovies.
Anchorovy Straws.—Rub or cut in three tablespoonfuls of butter into one and one-fourth cupful of flour, beat up the yolk of an egg with two tablespoonfuls of cold water, add this to the flour and mix it into a stiff paste. Roll it out on a floured baking board to one-eighth inch in thickness. Spread it over with a thin layer of anchovy paste and a dust of red pepper or paprika. Cut the pastry into thin straws about two inches long and lay them on a tin. Bake them a pale brown in a moderate oven. Serve them either hot or cold. For these the tin need not be greased.

Anna Thompson.

DAIRYING AND SOIL CULTURE

AN APPEAL TO FARMERS.

Pate of Nation Rests Largely on an Increased Food Supply.

President Wilson in his proclamation to the people appeals to farmers to do all in their power to increase the supply of foods. He says:

I take the liberty, therefore, of addressing this word to the farmers of the country and to all who work on the farms: The supreme need of our nation and of the nations with which we are cooperating is an abundance of supplies and especially of foodstuffs. The importance of an adequate food supply, especially for the present year, is superlative. Without abundant food alike for the armies and the peoples now at war the whole great enterprise upon which we have embarked will break down and fail. The world's food resources are low. Not only during the present emergency, but for some time after peace shall have come, both our own people and a large proportion of the people of Europe must rely upon the harvests in America.

Upon the farmers of this country, therefore, in large measure rest the fate of the war and the fate of the nations. May the nation not count upon them to omit no step that will increase the production of the food that is so vital to the world?

It is short. It is of the most imperative importance that everything possible be done, and done immediately, to make sure of large harvests. I call upon young men and old alike and upon the able-bodied boys of the land to accept and act upon this duty—to turn in hosts to the farms and make certain that no pains and no labor is lacking in this great matter.

I particularly appeal to the farmers of the south to plant abundant foodstuffs as well as cotton. They can show their patriotism in no better or more convincing way than by resisting the great temptation of the present price of cotton and helping, helping upon a great scale, to feed the nation and the peoples everywhere who are fighting for their liberties and for our own. The variety of their crops will be the visible measure of their comprehension of their national duty.

The government of the United States and the governments of the several states stand ready to co-operate. They will do everything possible to assist farmers in securing an adequate supply of seed, an adequate force of laborers when they are most needed, at harvest time, and the means of expediting shipments of fertilizers and farm machinery as well as of the crops themselves when harvested. The course of trade shall be as unimpeded as it is possible to make it, and there shall be no unwarranted manipulation of the nation's food supply by those who handle it on its way to the consumer. This is our opportunity to demonstrate the efficiency of a great democracy, and we shall not fall short of it.

FOR BETTER DAIRY Sires.

Bankers Aid Wisconsin Farmers to Secure Pure Bred Bulls.

In some sections the problem of securing good sires is a serious one, says a Wisconsin farm bulletin. Often bull clubs are formed by the farmers themselves, who combine their purchasing power to get the services of good sires co-operatively. In other communities bankers, merchants and creamery owners furnish funds on long time notes, making very satisfactory arrangements for their payment at the end of a two year period. A system of leasing sires, whereby a part of the money received from each farmer for service fees is used to pay the cost of bulls, is in use in several Wisconsin communities.

The plans described here have all been worked out. They are practical. There are undoubtedly many other successful ones. If your community could be benefited by a similar plan start it yourself. It will be a boon for the business men to make the first step. Live stock raising is the biggest business in Wisconsin. Many country bankers realize it, and they will meet you half way, for they see the importance of profit producing farm animals in the proper development of their communities.

Here are a few suggestions about buying:

First.—In buying a bull, get as good a one as you can afford. The sire, if a good pure bred, is more than half the herd.

Second.—If possible buy from a breeder whom you know.

Third.—Be sure you get stock from disease free herds.

Fourth.—Do not expect to buy good cows cheap. The poorest cows are those that are for sale in most herds.

Fifth.—Your best investment is to get heifers which have not freshened, but which have been bred to a registered sire of the same breed.

Sixth.—Buy as near home as possible. You save expenses, and if animals are not satisfactory your chances for a return are much better.

Time of Planting Corn.

May 1 to 17 has been the most profitable date during eleven years for planting corn at the Ohio experiment station at Wooster. Yields have been greater from corn planted in this period than from plantings made either earlier or later. The ears of the late planted corn have generally been small and immature.

FARM ANIMALS

CHANGE TYPE OF LIVE STOCK

Except in Improvement of Dairy Herd It Is Tedious Process—Drive for Uniformity.

If one wished to change the type of his live stock he will find various roads open to him and he may be confused as to which to take. First and most common, a sire of the desired type may be bought for the herd and year after year improvements may go on in this manner. But it is at best a tedious process and, except in the improvement of the dairy herd, it had better be avoided. Life at best is not long enough to observe very marked results by this method.

A much better method in the case of beef cattle, sheep and swine, if many are kept, is to provide a few females of the desired type and also a male for them, the progeny of which shall be sold or used as soon as gradually possible, so that the type will be changed.

It is not a good idea to sell off the stock of a cattle or other live stock on the farm and to procure those of the desired type at one time. This is the ideal method if it is financially possible.

FEED BOX FOR HORSES

Is hooked over the top edge of the wagon box the height is just right for the horses. The box prevents waste of grain and provides a better way to feed the horses than in the wagon box.

FATTENING RATION IN IOWA

By Reducing Corn and Increasing Silage Rapid Gains Were Made With Less Expense.

Silage has cheapened the fattening ration for steers in Iowa. One lot, receiving each per day 17 pounds of corn, 29 pounds of silage, 2 pounds of meal and 1 1/2 pounds of alfalfa, made gains at a cost of \$9.57 while another lot, receiving 8 1/2 pounds of corn, 51 pounds of silage, 2 pounds of meal and 1 1/2 pounds of alfalfa, made gains at a cost of \$7.67. The first lot averaged 2.94 pounds gain per day while the second lot averaged 3.04 pounds.

Reducing the corn and increasing the silage increased the gains and cut down the cost of making gains.—North Dakota Agricultural College.

PREVENT WASTE OF MANURES

Careful Attention Should Be Given to Barn Yards and Other Places Occupied by Cattle.

Careful attention should be given to the prevention of waste of manure in the barn lot and other yards occupied by the cattle.

With the high price of potash now prevailing, it is also important that all wood ashes be saved and applied to the egg yield.

POULTRY FACTS

PLYMOUTH ROCK IS POPULAR

Bred as First Originated Was of Barred Variety—White is Hardy and Adapted to Farms.

The most popular of all American breeds of poultry is the Plymouth Rock. This breed was first originated was of the Barred variety, which is yet the most popular of all the colors. Early in the breeding of Barred Plymouth Rocks fanciers reported the appearance of white chicks. They were "sports" and some were bred together, producing the present variety of White Plymouth Rocks. They have attained great popularity, widely bred, both for utility and fancy, and have proven perfectly satisfactory in either capacity.

They are hardy and especially adapted to farms. The hens lay large dark brown eggs of a grade much sought in certain localities.

The chicks are vigorous, strong and active, and grow exceptionally fast on range, reaching maturity at from five and one-half to six and one-half months old. They are readily salable for the highest grade of market poultry at all ages from broiler size to full maturity, and are very popular in some sections for the production of capons.

Males weigh from 8 to 11 pounds, females 7 to 10 pounds, and are probably the largest of all the Plymouth Rock family. Their plumage should be pure white, legs and beak deep rich yellow, combs small, single and fine. Such a fowl not only dresses to the best advantage and commands best prices, but is also very attractive in large flocks.

GIVE SOUR MILK TO CHICKS

Found Beneficial in Cases of White Diarrhea by Professor Kaupp of North Carolina.

When white diarrhea attacks a flock of young chicks many of them die, while those that survive are more or less stunted. Feeding freely on sour milk has been found beneficial. If sour milk does not act against the disease it at least gives the chicks greater strength and vitality so they are not seriously affected if attacked.

In some tests by Professor Kaupp of North Carolina he found that chicks fed on sour milk quickly recovered when attacked and the loss was only 10 to 16 per cent. In a similar lot, handled and fed the same except for the milk, the loss was 84 per cent the first month, while the remainder were in such a weakened condition that at the end of eight weeks 36 per cent had died.

TO GET EGGS DURING WINTER

Comfortable Houses Must Be Provided to Secure Most Profitable Returns From Hens.

Times have changed since chickens roosted out on the trees and fences. Once in a while you may see such farms where hens are permitted to follow this old way of roosting. But as a rule every hen must pay a profit or she goes to market and at an early age too. Hens are measured by the number of eggs they lay instead of by the number of pounds they weigh. Expensive houses are not necessary but must be comfortable to insure proper egg laying. A house should accommodate as many hens as space calls for without crowding; about two square feet of floor space per hen is about right. This keeps up the temperature in cold nights and still gives scratching room to insure egg production.

BRIGHTEN UP POULTRY HOUSE

Coat of Whitewash Given on First Warm Day Will Make Surroundings More Cheerful.

If the poultry house is dark and gloomy, give it a coat of whitewash on the first warm day and see how much that will brighten it up and make it more cheerful for the fowls. Barred hens make considerable difference in the egg yield.

The world's greatest artists in your home

With a Victor-Victrola in your home, all the great artists of the world await your command to appear before you.

While you sit at your ease the most famous opera stars—Caruso, Melba, Tetrazzini, and a host of others—sing for you soul-stirring arias and concerted numbers; Victor Herbert's Orchestra, Sousa's Band, Pryor's Band, play overtures, marches, waltzes—selections of every kind; Paderewski, Kubelik, and Mischa Elman render exquisite instrumental solos; Harry Lauder, Elsie Janis, and other noted comedians entertain you with their witty songs.

You hear all this wonderful variety of music and mirth just as it is rendered by the same artists in the great opera houses and theatres of the world.

Come in and we'll play your favorite music for you. Victor-Victrolas \$15 to \$200. Victors \$10 to \$300.

THURSDAY, JANUARY 10, 1918.

Entered at the Greenville, Ky., postoffice as second-class matter.

IN war a nation is compelled to do much that it ought to do in time of peace but does not.

SOCIETY and up to date business and manufacturing institutions are striving to become more efficient by removing all partitions.

IN the realm of shades Wilhelm, meeting Napoleon, Alexander and Caesar and responding to their "We told you so!" will reply, "Yes, you were right—it cannot be done."

THERE is a coal shortage so why should careless firemen waste fuel by filling the air with soot? Soot is a sign of the fireman's incompetence or of a badly designed furnace, or both.

By playing the hog in its peace talk with the Russian radicals Germany is conferring a great favor upon democracy. This is the point where German cupidity was bound to outflank German deviousness.

GERMANY pinned its faith on the 42 centimeter gun and the gun failed. Its hope to win victory from the submarine blew up. Its expectations of poison gas came short. Then along came the bolshevik and Germany felt immensely relieved. But even the bolshevik is not as foolish as he looks.

Let Roark supply your piano wants, for he has qualities and prices and a factory guarantee which is not limited by time.

Hear the Orpheus quartet sing "Carry Me Back to Old Virginia," on the Victrola at Roark's. Dozens of these records have been sold, every talking machine owner prizing it very highly.

Prof. F. J. Bowlds and bride, who was Miss Ella Lee Cox, of Owensboro, are at home with Mr. and Mrs. T. C. Baird, and are most welcome members of our local social and educational circles. They were married during the holidays.

God Save Them.

God save the divers kings from whom the anthem rings, from loyal throats; may they with wisdom choose all policies they use, and may they never lose their royal goats. God save all kings and queens, princes and horse marines, whose hearts are right; let us not choose and pick! God save the lowly kid, digging where bombs are thick there in the fight. God save the nameless wight, buried at dead of night, on foreign shore, buried in crimson mud, while like a ceaseless flood wavelets of human blood flow evermore. God save our noble boys, going where war destroys bodies of men; guard them by night and day, send them, from far away, when ended is the fray, safe home again. God save the widows all widows in but and hall, mothers and brides! Waiting for James or John, who is forever gone; and the red stream flows on, in sobbing tides. God save the little lads robbed of their loving dads, children who weep; kids at their mothers' knees, saying, "Where's daddy, please?" Lined up with such as these, monarchs are cheap.

WALT MASON.

Roark has many useful things of little cost, which are so much better than costly things of little use.

Feed the birds. These are trying times on our cheering, protecting friends.

Teamsters are charging extra prices now, but there is no pleasure and less profit in the service.

Prohibition To Help Win War.

The Manufacturers Record, published at Baltimore, Md., and one of the greatest journals of the South and which has done most for the industrial development of this part of our nation, has been a pioneer advocate of the adoption of national prohibition of whiskey, beer and like products to aid in winning the war, recently sent out inquiries to hundreds of coal operators, and the following responses were made by the operators in this country. They ring true and are in line with the opinion of these important factors in our affairs from all parts of the country, north and south:

Would Be the Greatest Step Towards Victory.

Black Diamond Coal & Mining Co., Diakesboro, Ky., Dec. 11, 1917. Editor Manufacturers Record:

As we believe that drink causes great loss in the production of all coals, the prohibition of making and selling would be the greatest step yet to help win this war.

W. W. Bridges, President.

Glad to Testify to Good Effects of Prohibition.

W. G. Duncan Coal Co., Greenville, Ky., Dec. 8, 1917. Editor Manufacturers Record:

Answering yours of December 4, I say that this has always been a very interesting proposition to us, and we can truthfully say that the unrestricted sale of liquor of any kind is a great detriment to public work, and without doubt its prohibition would add greatly to the efficiency of the labor of our country.

This is especially true in and about coal mines, and while we are under local option now, and are not affected to any considerable extent, we are always willing to add our testimony to the good results of prohibition to the labor of the country.

C. W. Taylor, Vice-President and Manager.

Would Largely Increase Coal Output.

Greenville Coal Co., Greenville, Ky. December 12, 1917. Editor Manufacturers Record:

We have your letter of the 4th, making inquiries as to our views on complete prohibition in the United States. We also have your slip addressed to President Wilson and the nation, headed, "One Great Aid to Winning the War."

We agree very heartily with every word and every argument uttered in your editorial. We believe that it will be one of the greatest aids to a successful winning of the war that can take place in the United States.

We know from our own experience and we are operating three mines, that it will largely increase the efficiency of our men and the output of our mines, and will be a great economic advantage and saving to our employes. The same thing that affects our men in our mines affects all men in all mines throughout the country. The use and sale of whiskey practically cause four days' loss every month, both in running time and in production, at all mines throughout the country, and in addition to this there are numerous days and occasions when the men lay off and will not work provided they can get the booze.

From an economical, financial and efficient stand point, total and complete closing of saloons, will serve penalties on anyone violating the law, is the paramount duty of our Government and people. It is no longer a question of morals; it is a question of life and death. Again assuring you of our hearty appreciation of the editorial and trusting that such great papers of yours will give us immediate results on this great question, I remain,

W. A. Wickliff, President.

Mr. D. O. Gregory made a business trip to Kuttawa the latter part of the week.

Who knows more about music than the world's greatest artists? They have chosen the Victrola for the exclusive presentation of their rare art and talents, and their rare art and talents, and their vital opinion is the safest guide for every purchaser of a talking machine. Let Roark demonstrate the supreme Victrola and records.

Railroads, already swamped, have been set still further behind by snow and cold, and deliveries can not now be depended upon with any degree of promptness or certainty.

Large stock of mirrors at Roark's. Small prices.

For She Has Saved The Soul Of The World.

"France embodies all of loveliness and all of valor. Beauty is her handmaiden, and strength her shield bearer, and the shining courage of her daughters has matched the courage of her dauntless sons. For three and a half terrible years she has walked, high of heart, through the valley of the shadow. Her body is in torture, but her forehead is alight with the beauty of the morning. Never in all history has there been such steadfast loyalty in the doing of dangerous duty, such devotion to country, such splendor of service and of sacrifice, and great shall be her reward—for she has saved the soul of the world."—From address by Theodore Roosevelt at the annual dinner of the Pennsylvania Society of New York.

There are over 300 talking machines on the market, but the Victrola is first—in thought, sales, service, satisfaction. See and hear why at Roarks.

Our highways and waterways are fully as important to us as our railways but we did not realize it until we were put to the extreme test of war.

Merchants of Greenville are wide-awake and seeking increased business. Trade with them in confident assurance of best goods at lowest prices.

That weather prophet who said we were to have three feet of snow this winter now stands at the top in his line, and if he will predict an early winning of this war, he will encourage us in making even shorter work of it.

Preparedness Necessity of Business.

We have recently received two Victrolas from Lyon & Healy, Chicago, which completes an order placed with them April 12, 1917. We secure Victrolas through four distributors, and the same condition exists with all of them, as the demand exceeds the factory output at all seasons. Only by keen foresight were we able to secure anything like an adequate supply of instruments for the holiday trade, and we still have machines due us on orders placed six and eight months ago. We have not placed an order for a machine since Sept. 15, 1917, on account of the above condition, but have shipments coming in almost every week, as our orders reach their turn with the various distributors. We have a fair supply of machines in stock, and hope soon to supply our customers who have been waiting weeks for a Victrola. The record situation is improving, and we have the greatest stock in this department we have ever been able to gather.

The J. L. Roark Estate.

Pure Bred Hogs Introduced.

Thursday, January 10th, is an epoch making event in the history of Muhlenberg County, since it marks the introduction of pure-bred livestock into the County. On that date 5 boys of the county will each receive a registered Duroc-Jersey gilt which is already bred and is of the very best stock afforded by Kentucky. It is epoch making not that it is the first introduction of pure bred livestock, but that it is the first introduction of its kind, and because of the superiority of the stock introduced.

The Farmers State Bank is financing the proposition to the Pig Club Boys in the County at the very low rate of 4 per cent interest. This gives the boys a chance to increase the hog production of the County at the present time, a chance to improve the stock of hogs in the County, and an opportunity to make some money for themselves, as well as to learn something about the hog business. This is only the beginning of a series of introductions which it is hoped will ultimately result in the elimination of the scrub from the County and the substitution of the pure-bred hog, which means greater profits from hog raising. For further information see the County Agent. Evan C. Graddy.

Buy a Victrola from Roark on terms as easy as you want to make them.

Provision for Local Boy.

Mr. E. L. Yonts, Jr., who for several years has been with the I. C. Railroad at Princeton, had a deserved New Year gift from the company by being appointed a traveling auditor, for this territory, and he has accepted and will enter upon his new duties about the middle of the month. There have been few boys reared here who have more friends than Eddie Yonts, and every one of them is jubilant over this recognition, which places Mr. Yonts in line for greater development.

Some people always get the best, others get what's left, and others get left. Select your Victrola now, at Roark's, and have delivery whenever you wish.

Miss Ora Sacre, after an illness of some months from tuberculosis, died at her home here early Sunday morning. Funeral services were held at the home by Rev. Frank, and interment was made at Friendship burial ground Monday afternoon.

Mr. James Spurlin was here from Depoy on business Tuesday.

City's New Officials.

The newly elected city officials took the oath of office Monday night, following the regular meeting of the council, both the old and new member meeting together. The new body transacted no business, but will meet again next Monday night, when they will elect the marshal, deputy, attorney, clerk, treasurer and assessor. Following are the officers: C. W. Roark, mayor; J. H. Smith, D. W. Christian, N. E. Lyon, W. M. Martin, Gordie Young, councilmen, W. H. Brizendine, who was elected, failed to qualify, and a councilman will be chosen in his stead at the Monday night meeting.

"Over the Top" and away out in front, the Victrola, with its many exclusive, patented features, leads the world in numbers and absolute supremacy of each instrument. Call at Roark's and see and hear why.

Mr. Chas Lovell is now stationed at Camp Lee, Petersburg, Va., in the U. S. Engineer training school. He is one of 2,000 men are under instruction. He was one of twenty-seven chosen from Camp Taylor, and it was quite an honor to be selected.

A home without music is lacking in brightness, cheer and comforts. Whatever your needs, let Roark help you. Most complete line of instruments in this section, and qualities highest.

Victor supremacy

Before the Victor was offered to the American public, the public only knew music as it was produced on music boxes and cylinder records.

With the invention of the Victor and its disc records, there gradually followed a musical awakening of the American people, for here was music reproduced in exact accord with the artist's interpretation.

And, when the Victor Company, through the lavish expenditure of millions of dollars and the combined efforts of its research and experimental departments, introduced the Victrola to the public, there was immediately established a new standard by which other instruments of like character were measured.

Since this time the gradual decline of the old cylinder types of phonographs and records, has prompted other manufacturers to acknowledge the superiority of the Victrola by adopting a disc type of instrument in imitation of the Victrola, but lacking the exclusive Victrola features which are patented and which no one dares to infringe.

A genuine Victrola costs no more than other instruments that only look like a Victrola.

Victrolas \$15 to \$300. Easy terms, if desired. Come in and we will gladly play any music you wish to hear.

Over 1500 Records in Stock. ANY Record in Two Days

KENTUCKY UTILITIES CO

INCORPORATED

J. A. GILMAN, District Manager

Telephone 251

The Nation's Needs Come First

Any patriotic American would gladly stand aside and give his place—anywhere—to an officer on government duty.

The placing of the Bell telephone system at the disposal of the government, as was done when war broke out, involved the same patriotic obligation.

During the months of military preparedness, the War and Navy Departments had the service of the most comprehensive and efficient telephone system in the world. And it must be kept so. In the face of the unprecedented demand from private sources, every government need must and will be met.

The government comes first, but we are doing everything that science can suggest and that money can accomplish to maintain our general service at the usual standard of efficiency. A loyal organization is working continuously to meet the increased demands and your patient co-operation will prove helpful and inspiring.

Telephone users can help by avoiding useless conversation and by encouraging their employees and associates to use the telephone only when necessary during the busy hours of the day, and to make their conversations brief.

With this patriotic attitude of the public toward us we can serve the government first and render a service that will meet the requirements of the commercial and social world.

ORCHARD GLEANINGS

PROTECT YOUNG TREES

Mice and rabbits like tree bark as well as children like candy, and it requires watchfulness to save young trees from being girdled by these little pests.

The rodents are kept away by wrapping trees with wire netting, or even tinned building paper; but paper is not so sure protection from mice. A six-inch mound of earth well packed around the base of the tree will help to turn away mice, and if the snow also is tramped down around the trees the mice will not be so likely to get at them, because they work under the surface as a rule.

PRUNE AND SPRAY ORCHARDS

Neglected Fruit Trees About Most Unprofitable Thing on Farm—Test at Missouri College.

Does orchard pruning and spraying pay? The answer is found in the results of co-operative experiments conducted by the College of Agriculture in 40 Missouri orchards. These experiments extended over a period of three years. They show first, that a neglected orchard is about the most unprofitable thing on the farm; second, that the best managed orchards in Missouri are producing more profit per acre than any other farm crop.

The average returns per acre of these 40 orchards during the last three years has been as follows: Properly pruned and sprayed areas, total received, \$176 per acre; net profit, \$143 per acre. Untreated areas, total received, \$18 per acre; net profit, nothing.

In order to obtain records of the results part of each orchard was allowed to remain in its previous condition—not pruned and not sprayed. The experiments, in view of the results obtained, show conclusively the advantages of renovation.

WAY TO KILL CODLING MOTH

Effective Method of Eradication is to Scrape Larvae From Branches During Winter.

All fruit growers that have watched the codling moth at all know that in the fall the full-grown worm, or larva, comes from the wormy apple, seeks a protected place under the rough bark or in the crotches of the trees, spins a cocoon about itself in which it remains inactive during the winter.

Codling Moth—A, Wormy Apple; B, Entrance at Crotch; C, Pupa; D, Worm; E, Moth; F, Head of Worm.

moth emerges from the cocoon to begin laying its eggs about the little fruit.

Each female lays on the average from 40 to 50 eggs, so if only a few of these chrysalises or hibernating larvae are destroyed the number of eggs to be deposited will be greatly reduced. A large per cent of the wintering larvae can be destroyed by scraping all round bark from the trees, especially in and about the crotches of the trees. If the scraping is done during the winter the larvae not killed in the process will be destroyed by the exposure and the birds.

The sooner fruit growers come to realize that this method of fighting this pest is almost as important as thorough spraying, the sooner they will begin to grow a larger per cent of worm-free fruit.

TO RESTRAIN APPLE CANKER

Most Important Orchard Enemy Still Is Widespread Enemy—Continuous Attention Needed.

Correspondence with apple growers and inspection of orchards by the University of Nebraska indicate that blister canker is still a widespread and most important apple enemy. Apple scab and blotch are readily controlled by proper spraying. Canker, however, requires continuous attention if it is to be held in control.

Owners of infected orchards should write to the experiment stations of their states for further information as to the best methods of control.

Roark's, Greenville, Ky.

THE KITCHEN CABINET

People seldom improve when they have no other model but themselves to copy after.—Goldsmith.

SEASONABLE DISHES.

Variety is the aim of most cooks, together with economy and palatability; we have three very important points to consider. The following dishes may prove suggestive:

Flaked Fish and Vegetable Hash.—Take equal parts of cold boiled potatoes, beets, carrots and turnips finely chopped. Season to taste with paprika, celery salt and a quarter of a cupful of cream, season with a teaspoonful of Worcestershire sauce and turn into a heated frying pan which has been greased with a tablespoonful of bacon fat. Stir the hash rapidly until well heated, roll and let brown, turn on to a hot platter as an omelet.

Eggs Scrambled With Dried Beef.—Cover six slices of dried beef with boiling water, let stand ten minutes, and drain; if not too salty this is not necessary; shred in small pieces. Beat two eggs slightly, add three tablespoonfuls of milk, and the beef. Melt two tablespoonfuls of butter in a saucepan, add the egg mixture and stir until of a creamy consistency.

Baked Rice With Cheese.—Put a cupful of rice into a quart of boiling water with 1½ teaspoonfuls of salt, cook for an hour or until soft. Melt three tablespoonfuls of butter, add three of flour, and when smooth add two cupfuls of hot milk; cook until smooth and thick, then add one cupful of finely cut cheese and mix lightly with the rice. Put into a buttered baking dish and cover with buttered crumbs. Brown and serve piping hot.

Pear Salad.—Place halves of canned pears on head lettuce served with the following: Two tablespoonfuls of olive oil, one teaspoonful of vinegar, salt, pepper and a bit of French mustard to taste. Roquefort cheese may be added, a tablespoonful or two mixed with the dressing, and the pears may be cut in strips and served on crisp watercress.

Vacuum Eggs.—Toast slices of bread cut three-quarters of an inch thick. Butter them after trimming in squares. Heap high on each the stiffly beaten white of an egg and slip an unbroken yolk into the depression. Put into a hot oven and cook until the egg is set. Garnish with parsley and serve.

Nellie Maxwell The KITCHEN CABINET

If you would not be forgotten as soon as you are dead, either write things worth reading or read things worth writing.—B. Franklin.

FOOD FOR THE FAMILY.

Put any piece of veal in a stewpan with just enough boiling water to cover it. Season with parsley, celery and leeks tied together, the neck of one lemon and one large carrot cut in dice. Boil for an hour, season with salt, then let simmer until the veal is tender; take it out and lay it in a roasting pan. Strain the broth; there should be two quarts. Put a half cupful of butter in a frying pan; in this brown two tablespoonfuls of flour, then add the hot broth and stir until smooth and creamy. Pour this over the roast and put into the oven to brown.

Stewed Lettuce.—This is a dish which will use the broken or unsightly leaves of lettuce and give the family an economical green. Cook the well-washed leaves until tender, drain, then put into a stewpan with thin slices of salt pork and a cupful of veal or chicken broth. Cook gently for an hour. Drain in a sieve, slightly thickened with the sauce and pour it over the lettuce when ready to serve.

German Carrots.—Cut four small carrots into slicing shreds. Put two tablespoonfuls of butter into a saucepan with a small onion finely chopped and cook until tender, then add the well-drained carrots, a teaspoonful of sugar, and let them simmer tightly covered. Do not let them scorch; add a little lemon juice and a sprinkling of parsley when ready to serve. Cream instead of lemon juice may be added for variety. Cooked peas may be added to the dish also, giving it variety. A heavy sirup, into which is stirred two or three tablespoonfuls of pineapple finely shredded, may be used as a sauce with cherry jelly, if no cream is at hand.

Chocolate and Checkerberry Pudding.—Heat a pint of milk with a square of grated chocolate; mix half a cupful of sugar, three tablespoonfuls of flour, the yolk of an egg and a pinch of salt, with the milk to make smooth; add to the boiling milk and cook until thick. Beat the white of the egg to a stiff froth, add one tablespoonful of sugar and a half teaspoonful of checkerberry essence. Put spoonfuls of this in a pudding dish and pour the cream around it.

TO RESTRAIN APPLE CANKER

Most Important Orchard Enemy Still Is Widespread Enemy—Continuous Attention Needed.

Correspondence with apple growers and inspection of orchards by the University of Nebraska indicate that blister canker is still a widespread and most important apple enemy. Apple scab and blotch are readily controlled by proper spraying. Canker, however, requires continuous attention if it is to be held in control.

Owners of infected orchards should write to the experiment stations of their states for further information as to the best methods of control.

LIVE STOCK

STEER RETARDED IN GROWTH

Stunting an Animal as Result of Insufficient Food May Be Only Temporary Condition.

Live stock products are the result of growth. By far the largest part of increase in animals is the result of growth. The younger the animals the greater the growth impulse. Many factors influence the tendency of an animal to grow. Among these are age, condition, gestation, lactation and the quantity and quality of food. A given amount of food will produce more growth on a young animal than on the same animal at a later age. All the growth factors influence the young animal much more powerfully than older animals.

If an animal's food supply is insufficient for normal growth, the animal may be retarded in growth. If this

Well-Fed Hereford.

treatment is continued for a long time the animal may become permanently stunted.

Stunting an animal as the result of insufficient food may be only a temporary condition. An animal does not lose its capacity to grow as the result of stunting. F. B. Mumford, dean of the Missouri College of Agriculture, cites a feeding test at the Missouri experiment station in which an animal that had been stunted by poor feeding to such an extent that it weighed only 200 pounds at twelve months of age, gained 841 pounds during the second year. Only 5.6 pounds of grain for each pound of gain were required.

It is certain that stunting an animal even for so long a period as twelve months does not destroy its capacity to grow.

GAINS MADE FEEDING LAMBS

Result of Test at South Dakota Station to Determine Value of Alfalfa and Prairie Hay.

The best gains ever secured at the South Dakota experiment station in feeding lambs was in an experiment to determine the comparative value of alfalfa and prairie hay with the same kind of a grain ration.

The grain ration consisted of a mixture of 100 pounds of oats, 100 pounds of shelled corn and 25 pounds of oil meal.

Each lot was started on one pound per head of the mixture daily, and increased until they were receiving two and one-tenths pounds per head of grain daily, and what hay they would eat.

The average daily gain per head for the lot that received the alfalfa hay was .51 of a pound, while with the lot that received the prairie hay, the average daily gain per head was .38 of a pound.

DAILY EXERCISE FOR STOCK

Horses and Mules Should Be Given Run for an Hour or So in Lot Adjoining Stables.

Horses and mules should have good daily carding and regular exercise. If there is nothing for them to do remove their stables and give them a run for an hour or so in a well-fenced lot adjoining the stables.

The best and safest fence for pasture is of stout woven wire, rail or a combination board and smooth wire. Barbed wire should not be used, as it is dangerous.

SUNLIGHT IS BIG ESSENTIAL

Provision for Admission of Maximum Amount of Light in Barn Should Not Be Overlooked.

No barns or shelters for any kind of animals should ever be constructed without making ample provision for the admission of the maximum amount of sunlight. Such buildings should have a southern exposure, if possible. This will provide extra warmth in the winter time and the sunlight which is thus permitted to enter the building will destroy many disease germs.

THE KITCHEN CABINET

People seldom improve when they have no other model but themselves to copy after.—Goldsmith.

SEASONABLE DISHES.

Variety is the aim of most cooks, together with economy and palatability; we have three very important points to consider. The following dishes may prove suggestive:

Flaked Fish and Vegetable Hash.—Take equal parts of cold boiled potatoes, beets, carrots and turnips finely chopped. Season to taste with paprika, celery salt and a quarter of a cupful of cream, season with a teaspoonful of Worcestershire sauce and turn into a heated frying pan which has been greased with a tablespoonful of bacon fat. Stir the hash rapidly until well heated, roll and let brown, turn on to a hot platter as an omelet.

Eggs Scrambled With Dried Beef.—Cover six slices of dried beef with boiling water, let stand ten minutes, and drain; if not too salty this is not necessary; shred in small pieces. Beat two eggs slightly, add three tablespoonfuls of milk, and the beef. Melt two tablespoonfuls of butter in a saucepan, add the egg mixture and stir until of a creamy consistency.

Baked Rice With Cheese.—Put a cupful of rice into a quart of boiling water with 1½ teaspoonfuls of salt, cook for an hour or until soft. Melt three tablespoonfuls of butter, add three of flour, and when smooth add two cupfuls of hot milk; cook until smooth and thick, then add one cupful of finely cut cheese and mix lightly with the rice. Put into a buttered baking dish and cover with buttered crumbs. Brown and serve piping hot.

Pear Salad.—Place halves of canned pears on head lettuce served with the following: Two tablespoonfuls of olive oil, one teaspoonful of vinegar, salt, pepper and a bit of French mustard to taste. Boquet cheese may be added a tablespoonful or two mixed with the dressing, and the pears may be cut in strips and served on crisp watercress.

Venus Eggs.—Toast slices of bread cut three-quarters of an inch thick. Butter them after trimming in squares. Heap high on each the stiffly beaten white of an egg and slip an unbroken yolk into the depression. Put into a hot oven and cook until the egg is set. Garnish with parsley and serve.

If you would not be forgotten as soon as you are dead, either write things worth reading or read things worth writing.—B. Franklin.

FOOD FOR THE FAMILY.

Put any piece of veal in a stewpan with just enough boiling water to cover it. Season

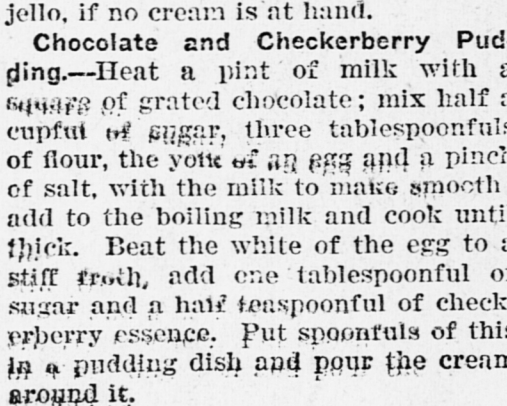

with parsley, celery and leeks tied together, the peck of one lemon and one large carrot cut in dice. Boil for an hour, season with salt, then let simmer until the veal is tender; take it out and lay it in a roasting pan. Strain the broth; there should be two quarts. Put a half cupful of butter in a frying pan; in this brown two tablespoonfuls of flour, then add the hot broth and stir until smooth and creamy. Pour this over the roast and put into the oven to brown.

Stewed Lettuce.—This is a dish which will use the broken or unsightly leaves of lettuce and give the family an economical green. Cook the well-washed leaves until tender, drain, then put into a stewpan with thin slices of salt pork and a cupful of veal or chicken broth. Cook gently for an hour. Drain in a sieve, slightly thicken the sauce and pour it over the lettuce when ready to serve.

German Carrots.—Cut four small carrots into shooting shreds. Put two tablespoonfuls of butter into a saucepan with a small onion finely chopped and cook until tender, then add the well-drained carrots, a teaspoonful of sugar, and let them simmer tightly covered. Do not let them scorch; add a little lemon juice and a sprinkling of parsley when ready to serve. Cream instead of lemon juice may be added for variety. Cooked peas may be added to the dish also, giving it variety. A heavy slurr, into which is stirred two or three tablespoonfuls of pineapple finely shredded, may be used as a sauce with cherry jelly, if no cream is at hand.

Chocolate and Checkerberry Pudding.—Heat a pint of milk with a square of grated chocolate; mix half a cupful of sugar, three tablespoonfuls of flour, the yolk of an egg and a pinch of salt, with the milk to make smooth; add to the boiling milk and cook until thick. Beat the white of the egg to a stiff froth, add one tablespoonful of sugar and a half teaspoonful of checkerberry essence. Put spoonfuls of this in a pudding dish and pour the cream around it.

STEER RETARDED IN GROWTH

Stunting an Animal as Result of Insufficient Food May Be Only Temporary Condition.

Live stock products are the result of growth. By far the largest part of increase in animals is the result of growth. The younger the animals the greater the growth impulse. Many factors influence the tendency of an animal to grow. Among these are age, condition, gestation, lactation and the quantity and quality of food. A given amount of food will produce more growth on a young animal than on the same animal at a later age. All the growth factors influence the young animal much more powerfully than older animals.

If an animal's food supply is insufficient for normal growth, the animal may be retarded in growth. If this

Well-Fed Hereford.

treatment is continued for a long time the animal may become permanently stunted.

Stunting an animal as the result of insufficient food may be only a temporary condition. An animal does not lose its capacity to grow as the result of stunting. F. B. Mumford, dean of the Missouri College of Agriculture, cites a feeding test at the Missouri experiment station in which an animal that had been stunted by poor feeding to such an extent that it weighed only 200 pounds at twelve months of age, gained 841 pounds during the second year. Only 5.6 pounds of grain for each pound of gain made were required on this steer stunted during the first twelve months. A steer that had been generously fed during the first twelve months of his life gained only 500 pounds during the second twelve months, and this gain was more expensive than the gain made on the stunted steer. The amount of grain required to make a pound of gain on the well-fed steer was 9.8 pounds.

It is certain that stunting an animal even for so long a period as twelve months does not destroy its capacity to grow.

GAINS MADE FEEDING LAMBS

Result of Test at South Dakota Station to Determine Value of Alfalfa and Prairie Hay.

The best gains ever secured at the South Dakota experiment station in feeding lambs was in an experiment to determine the comparative value of alfalfa and prairie hay with the same kind of a grain ration.

The grain ration consisted of a mixture of 100 pounds of oats, 100 pounds of shelled corn and 25 pounds of oil meal.

Each lot was started on one pound per head of the mixture daily, and increased until they were receiving two and one-tenth pounds per head of grain daily, and what hay they would eat.

The average daily gain per head for the lot that received the alfalfa hay was .51 of a pound, while with the lot that received the prairie hay, the average daily gain per head was .38 of a pound.

DAILY EXERCISE FOR STOCK

Horses and Mules Should Be Given Run for an Hour or So in Lot Adjoining Stables.

Horses and mules should have good daily carding and regular exercise. If there is nothing for them to do remove their shoes and give them a run for an hour or so in a well-fenced lot adjoining the stables.

The best and safest fence for pasture is of stout woven wire, rail or a combination board and smooth wire. Barbed wire should not be used, as it is dangerous.

SUNLIGHT IS BIG ESSENTIAL

Provision for Admission of Maximum Amount of Light in Barn Should Not Be Overlooked.

No barns or shelters for any kind of animals should ever be constructed without making ample provision for the admission of the maximum amount of sunlight. Such buildings should have a southern exposure, if possible. This will provide extra warmth in the winter time and the sunlight which is thus permitted to enter the building will destroy many disease germs.

Saved Girl's Life

"I want to tell you what wonderful benefit I have received from the use of Thedford's Black-Draught," writes Mrs. Sylvania Woods, of Clifton Mills, Ky.

"It certainly has no equal for a gripe, bad colds, liver and stomach troubles. I firmly believe Black-Draught saved my little girl's life. When she had the measles, they went in on her, but one good dose of Thedford's Black-Draught made them break out, and she has had no more trouble. I shall never be without

THEDFORD'S BLACK-DRAUGHT

in my home." For constipation, indigestion, headache, dizziness, malaria, chills and fever, biliousness, and all similar ailments, Thedford's Black-Draught has proved itself a safe, reliable, gentle and valuable remedy.

If you suffer from any of these complaints, try Black-Draught. It is a medicine of known merit. Seventy-five years of splendid success proves its value. Good for young and old. For sale everywhere. Price 25 cents.

THE ADLER PIANO AND THE ADLER ORGAN

For Churches and the Home

After you have made a thorough investigation of the different methods of selling Pianos and Organs, just figure what you can save if you buy from the factory.

Remember, a retailer has his expense of selling, besides his profit. You can save all of this at our factory.

We make as fine instruments as are manufactured and sell direct to the homes on small payments and liberal terms if desired.

We have a special Showroom conveniently located at our factory, Twenty-ninth and Chestnut Streets, where the ADLER Pianos and Organs can be seen finished and in process of construction.

Come and see us or send for the catalogue you desire

Local Mention.

Many persons are "laid up" with colds now.

School opened Monday, after a two-week holiday vacation.

Sleds have been about the safest method of travel, lately.

The local exemption board is about the busiest bunch of folks to be found anywhere.

The Victrola, with many exclusive features, is supreme. A demonstration convinces. Roark will be glad to meet any test.

If a new broom sweeps clean, old Muhlenberg should glisten, as all our county and city officials are new.

Bought for one, enjoyed by all—that's the Victrola.

Roswell, S. D., claims to be the banner patriotic city of the nation, since every man, woman and child living there has joined the Red Cross.

The vast supply of canned vegetables and fruits have come in mighty handy this winter.

There is a great demand for religious, patriotic and old-time songs, and Roark has the fullest selections to be found in this part of Kentucky.

The days begin to lengthen, but the sun has not begun to strengthen, to any agreeable degree.

There is a stream of travel to this place, a large part of it being occasioned by the calls before the exemption board, for various purposes.

Victor records in abundance at Roark's.

Eastern railroads are leading in the matter of retrenchment as to cancellation of trains, the Pennsylvania lines east of Pittsburgh dispensing with almost 200 passenger trains daily.

Not of "Age," But a Giant.

The Victor Talking Machine Co. is entering its twentieth year, being established in 1898, and has in that period so far surpassed the several concerns already in the field, and the hundreds (more than 300 to be definite) since entering, that now almost half the business of the world is being done by the Victor Co. There are, necessarily, many vital reasons for this wonderful recognition and adoption, and Roark can explain and demonstrate to the complete satisfaction of anyone, and will gladly do so, whether you ever expect to buy or not.

Farmers are doing much planning on the year's work, as fancy returns are assured for all products.

Notwithstanding there is an urgent call for labor, there is a full supply of loafers.

All your dreams will come true if you will put a Victrola in your home.

Some Christmas gifts are just beginning to give service and joy, while others are in the discard.

Mr. Lee Fentress is able to be up and about, after confinement by a fall of a few weeks ago. He is yet suffering somewhat from his injuries but will soon be entirely recovered.

Davenetts at less prices and better upholstery at Roark's.

The next draft call for troops is scheduled for February 15.

The Victrola, at home and abroad, outdoes any instrument, many times over, and comparisons will plainly show you why. Roark will gladly demonstrate.

Begin at once to make 1918 the greatest year we have ever had.

The Central City Argus has just moved into its new home, a commodious structure just having been completed. May its usefulness be increased by the new move.

"Cash and carry" shops are growing amazingly, getting the fullest support of the thoughtful, patriotic people. It would be the best thing which ever happened to the nation if we should be put on a spot cash basis.

Rural automobiles are getting a rest.

Statistics just issued by the Bureau of Commerce and Labor show that the musical instrument industry stands eleventh in importance, for 1917; in 1916 it stood thirteenth.

A world of music for an atom of price is what every possessor of a Victrola gets. Suitable, appealing, substantial gifts for weddings, anniversaries, holidays can be had at Roark's.

The weather man sure has a grudge at us.

You are thankful today because you have a Victrola in your home. If you haven't, you'll be thankful every day following the one on which you do secure the varied pleasures and benefits of one of these superb instruments. See Roark about it.

There is a scarcity of calendars this year. The cost has mounted so high that few concerns are using them, and many business houses have not had one from any of their factories and wholesale friends. Almanacs are more in demand than ever before.

Right in your home you can have the greatest concert in the world, for on your Victrola you can command greatest artists, from Abbot to Zimbalist, to sing, play or speak for you. Call at Roark's and arrange for one of these instruments.

Unless the greed of many is broken the giving being done by millions of our people will not save us from disaster in this war.

Every talking machine in the world is fitted to play Victor records and this recognition of Victor supremacy should be followed by users of other machines. Roark carries in stock more records than all agents in the county combine, and you can hear any record you wish, and visit visits are urged.

The story is being told that a clerk who had a customer at Christmas, consuming considerable time when everybody was at top speed, but who failed to buy anything, caused the clerk to go to the cash register and maliciously punch the "no sale" key after the departure of the looker.

Hear the records by Jascha Heifetz, the wonderful Polish violinist who has set the world aglow by his wonderful genius. He is only 18, and is pronounced by old and new world critics as the greatest artist of the age. Roark has the records he has made, and but one of his offerings has been played by any other artist.

"Who saves his country saves himself, saves all things, and all things saved do bless him. Who lets his country die, dies himself ignominiously and all things dying curse him!"

There is now a strong demand for religious music, and you are invited to hear "I Need Thee Every Hour." Sung by McDougough and Bieling on the Victrola at Roark's. The author Mrs. Annie Lowry Hawks, aged 83, died the first of the year at her home in Bennington, Vt.

We may feel like complaining about our few inches of snow and near-zero weather, but a large part of the country is snowed under, traffic closed and temperatures from 20 to 50 below.

There is not a talking machine made which will not play Victor records, and Roark has a great supply.

There is a gasoline famine on here no gas being available for several days, and there has been some scrambling to get enough to operate transfer cars and drays.

A "phonygraft" dealer in a town not a thousand miles away had a card displayed "These machines at \$100 break all records." A passer-by who knew of the demerits of the machine observed: "I knew they would quickly wear records out by their grabby, gritty grind, but had no thought of it going this far."

Sharp Practices Cannot Endure.

For eight years we have been distributing Victrolas in Muhlenberg, and our faith in them is much stronger now than when we secured the agency, for the decision reached then, after an exhaustive study of all machines on the market, led us to the Victrola, and its performance has given most complete satisfaction to every purchaser, so much so that from first to last machines sold by us are in the hands of the original purchasers. The field is enlarging rapidly, and in time practically every home will have some sort of machine. It is to our interest, and to the moral interest of every buyer, that most thorough investigation be made in the selection of this item. We have at all times a representative stock of instruments and records, and gladly give public demonstrations. Records of all machines will be played, and the most thorough investigation and comparison of both machines and records should be made by you, and are invited by us. No sharp practices have ever been used by us in making sales, and we will not resort to trickery, "double-decking" of records in the making of "demonstrations," and other hoodwinking acts and statements followed by some dealers. Everybody gets a square deal from us, before and after a sale, and we refer to our large family of Victrola users, our best incentive and greatest asset in the continual enlargement of this branch of our establishment. Very truly yours, THE J. L. ROARK ESTATE, Orin L. Roark, Manager.

Red Cross Items.

The officials of the American Red Cross are receiving cablegrams hourly from England and France pleading for surgical dressings and urging that all other work be set aside temporarily. On account of this and because the local chapter has received an order for 2500 gauze wipes to be sent as soon as possible the ladies are giving all their time to this line of work and although they are small and tedious to make they have almost 1000 ready.

Mrs. Hopkins of Lexington arrived Tuesday to conduct a class in standard and surgical dressings so there will probably be no sewing done for a week or perhaps ten days.

The knitters are quite busy and are bringing in knitted articles daily but they are urged to do even more so that a box of knitted articles may be shipped by February tenth.

Those who have registered as workers at the Red Cross rooms since January fourth are Mesdames C. B. Martin, E. R. Yost, C. B. Bailas, Fred Head, J. J. Rice, R. D. Brooks, Carl Duncan, A. J. Yeargan, H. C. Wilkinson, C. W. Taylor, W. G. Crawford, Mollie S. Reynolds, C. M. Martin, J. G. Chatham, R. C. Love, L. E. Rice, Geo. Fentress, R. M. Woodson, J. L. Rogers, T. B. Pannell, Jno. T. Reynolds, H. O. Meredith, W. G. Duncan, Jr. W. O. Belcher, G. E. Countzler, D. S. Duncan, J. S. Tinsley, J. H. Bray, C. W. Roark, Misses Lucile Kirkpatrick, Margaret Taylor, Jenny Taylor, Margaret Wickliffe, Mable Sparks, Mary Pannell, Annie Richardson, Caroline Oates.

Appearance, construction, tone, quality, cost—the Lyon & Healy pianos excel. Roark is factory representative for Muhlenberg, and invites investigation and comparison.

Traveling men are getting out again, after the holiday lay-off.

We're here to help you get the best results and the most satisfaction from your talking machine, no matter what make, and our eight years' experience is freely at your command, and should be of benefit to you. The J. L. Roark Estate.

Fight the rats and mice, and kill all the dogs. War needs and health protection demand it.

Our Advertising

is not to sell goods, but to enable people to intelligently and economically buy goods. It is impossible for us to get any benefit from it unless we have helped the customer. The J. L. Roark Estate.

Mr. Harry C. Poag, of Barlow, was here on a business trip a few days during the week.

Central Agricultural Board of Control.

The Central Agricultural Board of Control, which is a body of men made up of one representative from each of the Community Clubs of the County and one man from each of the following towns, Greenville, Central City and Drakesboro, will meet on Thursday, January 17th, for the consideration of some very important matters.

This board is the advisor and co-operator of the County Agent and will help at this meeting in the formulation of plans for the work during the coming year and help the County Agent to make his work more effective and reach a larger number of people. Each man who is a member of this board should feel his responsibility in this regard and not fail to attend this meeting not only for the benefit to himself and the community which he represents but also for the benefit of agriculture in the entire county. Every man should render his bit of patriotic service in this great world wide war. So do not fail this part.

Evan C. Graddy
County Agent

The "i c" in Victrola and the "i" in music are the same.

Food Conservation Course Here.

Friday and Saturday, January 11 and 12, Muhlenberg County will be visited by two Demonstrators from Washington, "in War Breads and vegetables cooking. State Home Demonstration Agent, Mrs. Helen B. Wollott, District Home Demonstration Agents and many of the Home Demonstration Agents from other Counties. This is a course in making preparing and cooking the various materials designed to instruct the Home Demonstration Agents and Club Girls, as well as the general public.

All are invited to attend this meeting at Greenville which is an opportunity which will be enjoyed only by a few Counties in the State and all who can possibly do so should make arrangements to attend. Beginning at 9 o'clock in the morning the demonstration will continue through the days and at all times things of value and material which will save for the home will be actually demonstrated to all that are interested. Do not miss this rare opportunity. Iris Boggess, Home Demonstration Agent.

Four Victrolas sold by Roark this week and he begins to count that day lost wherein he does not sell one—a greater part of the loss being with the party who should have the instrument but does not realize it.

New Officials of County.

Muhlenberg's new officials are now at the helm, taking charge last Monday. Voters made a change in the political complexion, as well as the personnel of its officers, the Republicans again being in the saddle, after a reign of eight years by the Democrats. Following is a list of the officials:

Representative, A. J. McCandless. County Judge, J. Ed. Shaver. County Attorney, T. J. Sparks. County Court Clerk, I. P. Sumner. Sheriff, Arthur Lile. Jailor, S. P. Miller. School Superintendent, V. M. Mosely. Coroner, T. R. Casebier. Assessor, C. W. Cisney. Assessor, Juleon W. Allen.

Severe weather has caused a slow ing down in all lines, which were already slow enough to worry many of us.

Pointed Paragraphs.

A rolling stone accumulates no dust. A man's ideal woman is one kind of pipe dream. Modesty is a principal ingredient in the composition of a truly great man.

The wise man forgets his wisdom when he encounters a silly girl with a dimple.

A woman's curiosity is exceeded only by that of the man who says he hasn't any.

An undertaker is probably so called because he eventually overtakes the rest of mankind.

Some people make an awful fuss about a man's being his own worst enemy—but why should they care. The trouble with most true stories is that it is customary to add a few lies to make them interesting.

Our Country! In her intercourse with foreign nations may she always be in the right, but our country, right or wrong, —Stephen Decatur.

Do you realize how much this tapering tone-arm means to a talking-machine?

It is the tapering tone-arm of the Victrola—scientifically calculated and constructed to conform to the expanding sound waves created by the sound-box of the Victrola.

Its exact taper and perfectly smooth bore enable the sound waves to keep on expanding without a break, and result in a pure, clear, beautiful tone that is as real and true as life itself—something you can't get without this perfect smoothness and full tapering of the tone-arm.

Without this full tapering of the tone-arm, the sound waves lack fulness or roundness; without the perfectly smooth bore, they break up and become harsh and rasping.

That's the reason for this tapering tone-arm—an exclusive patented Victor feature—and it is tapered exactly right to give the best results. The Victor people manufacture everything that goes into their goods to gauge of 1/2,000 of an inch, which is the only guarantee of absolute accuracy.

The proof is in the hearing. Come in any time and hear the Victrola and you'll appreciate its wonderful tone.

There are Victor and Victrolas in great variety from \$10 to \$300, and we'll arrange easy terms, if desired.

A copy of this great book is yours for the asking

The Victor Record Catalog
is the most complete catalog of music in the world

It is the recognized authoritative index to the world's best music, to the greatest musical achievement of all time. It has required nineteen years of constant research, of tireless effort, and the expenditure of eleven million dollars to place this catalog in your hands. Its 506 pages tell you not only all the music that the Victrola brings to your home, but give you a wealth of interesting information about all the great artists who make records for the Victor exclusively, and about operas, composers and musical history. Through each and every page runs the story and proof of Victor Supremacy. Each and every page is a reason why the Victrola should be in every home. If you are a music-lover, you should call on us for your copy of this great book, whether or not you have a Victrola in your home.
